### PERSONAL STATEMENT

As a human-computer interaction student at UCL, I am committed to creating user-centered designs that improve people's lives. With a background in neuroscience, I bring a unique perspective to understanding human behavior and cognition. I am excited to apply my skills and knowledge to create intuitive and delightful user experiences in the field of UX.

I have experience in design i.e. creating wireframes and prototypes, as well as in research (qualitative and quantitative methods). I also have a basic understanding of HTML and CSS, and am able to create data visualizations with python.

### WORK EXPERIENCE

Specialist / Apple **Retail**

Aug 2021 - Jul 2022

- Provided a complete solution for customers (incl. product/service purchases, AppleCare, and further support)
- Learning from customers with a variety of backgrounds has highlighted the importance of inclusive and accessible design
- Gained a deep understanding of Apple's products, services, and software. I'm also comfortable troubleshooting technical issues and quickly learning new software and hardware
- Worked collaboratively with other team members to ensure a seamless customer experience

### EDUCATION

**MSc in Human-Computer Interaction**, Expected Grad. Aug 23

University College London

**Dissertation Topic:** Exploring How Recent AI Developments can Augment Human Cognition

First term modules:

- Interaction Science
- Interaction Design

Second term modules:

- Affective Interaction
- Future Interfaces
- The Digital Workplace
- User-Centred Data Visualisation

Third term module:

- MSc Project (Dissertation)

**BSc in Neuroscience**, 2018-21

King's College London

2:1 (66%) | 3.7 GPA

**Dissertation Topic:** Current Therapeutics for Alzheimer's Disease

**A-Levels**, 2016-17

AABB (in Chemistry, Biology, Maths, and Welsh Baccalaureate)
